

APT ENDOWMENT CAMPAIGN

Martin Weaver Student Scholarship

The Martin Weaver Student Scholarship promotes the advancement of young professionals in the early stages of their careers in Historic Preservation. It is not a prize for past accomplishments but instead intended to assist their growth in the field. The scholarship supports current and innovative research as well as foreign travel which results in presentations made available and published through the APT website, *APT Bulletin*, and the APT journal.

MARTIN WEAVER THE PRESERVATIONIST

Martin Edward Weaver was a well-known senior research scholar and Adjunct Associate Professor of Historic Preservation at Columbia University's Graduate School of Architecture, Planning and Preservation from 1991 to 2003 and was a member of the APT College of Fellows. He was an expert in the conservation of wood-based architectural materials and helped develop the scientific field of architectural conservation in the United States and internationally. Originally trained as an architect, his exposure to archaeological excavations in the United Kingdom, Greece, and Iran catalyzed his interest in historic preservation in the late 1960s. Martin Weaver is well known from his book, *Conserving Buildings* (co-authored with Frank G. Matero), published in 1997.

MARTIN WEAVER SCHOLARSHIP APPLICATION

In addition to completing an APT Student Scholarship application, students interested in being considered for the Martin Weaver Scholarship must submit a short essay describing how the grant money would be used to further research and/or a career in historic preservation. Include a description of any interest in wood-based architectural materials if applicable.

MARTIN WEAVER SCHOLARSHIP GRANT

The Martin Weaver Scholarship recipient will receive an APT Student Scholarship to cover costs to participate in the APT Conference, as well as a Martin Weaver Scholarship.

The APT Endowment Campaign Committee and the APT Student Scholarships Committee will award the Martin Weaver Student Scholarship to a student scholar as a research grant. The grant will be awarded to a student who has an academic background, professional experience, and an established commitment in one or more of the following fields:

- Architecture
- Conservation
- Architectural History
- Historic Preservation
- History of Technology

The Student Scholarships Committee will consider student abstracts for the research and/or execution of a preservation-related project in any of these fields as they relate to the APT Conference theme.
