

Job Posting: August 28, 2009

Structures North Consulting Engineers Inc., a regional leader in the field of Historic Preservation, has an immediate position open for an Associate Level Structural Engineer.

The successful candidate will be a licensed Professional (PE) Structural Engineer with experience in the investigation, evaluation and rehabilitation of historic structures. Preference will be given to candidates with over 5 years of the experience working with historic building materials particularly masonry and timber. A masters degree in structural engineering is preferred.

Candidates must be self starters dedicated to client satisfaction, business development and continued personal professional growth; and must possess a general working knowledge and comfort around information technology. Responsibilities to include development, management and implementation of projects from start to finish as well as new business development.

Positions are available in both our Salem, MA and Hartford, CT offices.

Please submit resumes via email to: jwathne@structures-north.com
