PRESERVATION ENGINEERING TECHNICAL COMMITTEE

Sponsorship Information

6th Annual Preservation Engineering Student Design-Build Competition

The 6th edition of the growing APT Preservation Engineering Technical Committee (PETC) Student Design-Build Competition will conclude with finals in Washington, D.C. at the 2021 APT Annual Conference. This year's conference theme is Preservation and Beyond Politics, where the PETC Student Design-Build Competition will continue to reach new audiences and engage students to improve the Preservation Industry.

An estimated 30 students, representing the 5 finalists' teams, will be at the competition finals. PETC is seeking to raise $15,000 to cover conference attendance costs, workshop, meals and accommodations for the students, as well as costs to run the competition. Sponsors will be given visibility (depending on level) on the competition posters, t-shirts the teams will be wearing, the PETC Student Design-Build website, and acknowledgement at competition events.

Check out the PETC website for more information about the Student Design-Build Competition here.
